

Dr. Mehdi Mirzaei-Alavijeh

Date: 3/9/2021

Personal Information:

Sex: Male

Date of Birth: 7/30/1983

Place of Birth: Isfahan

Citizenship:

Iran

Address and Telephone Numbers:

Kermanshah University of Medical Sciences, School of Health, alongside Farabi hospital, Isar square, Kermanshah city, I.R. of Iran

Postal code: 6719851351

Tel: +988338264165

Fax: +988338263048

Present Position: Academic Member

Education:

Undergraduate

Graduate

Postgraduate

Academic Positions / Employment: Department of health education and promotion

University and Hospital Appointments and Committees: ---

Medical Licensure and Board Certification: ---

Military Service:

Continuing military obligations

Honors and Awards: ---

Editorial Responsibilities: ----

Professional Societies and Organizations: ----

Major Invited Professorships and Lectureships: ---

Consulting Relationships and Board Memberships:----

Research Support (role, title, duration, amount):

Governmental

- A Survey of Students' Perspectives of Yazd Shahid Sadoughi University of Medical Sciences on Obstacles to Research Activities, 2011
- Evaluation of the effect of drug addiction prevention education in students of Shahid Sadoughi University of Medical Sciences in Yazd using the theory of planned behavior in 2011
- A survey of knowledge, perceived risk and behavioral intent about hepatitis A on the teaching staff of primary schools in Yazd in 2010-2011
- Survey of knowledge, attitude and practice of housewives in Shahid Sadoughi University of Medical Sciences in Yazd regarding solid waste recycling in 2011.
- Survey of knowledge, attitude and practice of students of Shahid Sadoughi University of Medical Sciences in relation to solid waste recycling in 2011
- Investigation of HBM model constructs (health belief model) in relation to hepatitis B disease in health workers of Taft city in 2011.
- Investigating the effect of health belief model training on refrigerator repairers in the field of safety-health and environmental effects (HSE) of chlorofluorocarbons (CFCs).
- Evaluating the quantitative and qualitative trend of the progress of Shahid Motahari Educational Festival during the last six periods based on the Sip model
- Investigating the attitudes of young people about to get married in relation to knowing their future spouse and living together in the city of Borujen.

- Prevalence, knowledge and practice of female students of Shahid Sadoughi University of Medical Sciences in Yazd compared to dysmenorrhea in 2010.
- Awareness, perceived risk and behavioral intention about hepatitis B and C on students of Isfahan University of Medical Sciences in 2011
- Survey of quality of life of employees of Yazd city health center in 1390.
- Assessing the educational needs of women referring to the infertility center of Yazd province in 2011
- Survey of opinions of residents of different educational departments regarding the status of clinical education in related departments of Shahid Sadoughi University of Medical Sciences in Yazd in 2011.
- Investigating the effective factors on the use of masks in workers of ceramic tile industry in Yazd province
- A comparative study of the effect of education based on Islamic teachings and general education in raising awareness; Attitudes and practices of oral health of high school male students in Yazd
- Investigation of lighting situation in Bank Mellat branches in Yazd in 2012.
- Evaluation of educational performance of health schools in the country
- A study of learning styles and preferred education methods of students of Shahid Sadoughi University of Medical Sciences and Health Services in Yazd in 2012.
- Analysis of Predictors of Relapse among Addicts Referred to Kohgiluyeh and Boyer-Ahmad Province Addiction Treatment Center
- Prevalence and factors related to glass consumption among adolescents in Yasuj using the model of perceptions and tendencies
- Evaluation of predictors of Ritalin abuse among students of Yasouj University of Medical Sciences using the Health Belief Model
- Community-based intervention to control and reduce hypertension based on the intervention cartography protocol in the villages of Abadan city
- Evaluation of Predictors of Breast Cancer Screening Behavior among Women Referred to Abadan Health Centers Using Protection Motivation Therapy
- Analysis of breastfeeding behavior among women with 1 to 6 months old children referred to health centers in Abadan using health belief model
- Investigating the role of resilience and social support in relapse of substance use among addicts referred to methadone therapy centers
- Evaluation of mental health and related underlying factors among addicts referred to methadone therapy centers
- Evaluation of cognitive factors affecting prostate cancer screening behaviors among men over 50 years old using the theory of planned behavior
- Evaluation of Pap smear status and awareness of cervical cancer among women referring to health centers
- Evaluation of cognitive factors determining blood donation among students of Abadan University of Medical Sciences and Health Services
- Evaluation of predictors of oral health among primary school students in Shadegan using health belief model
- Evaluation of predictive factors of influenza prevention behaviors among high school students in Shadegan using health belief model
- Prevalence and factors related to arbitrary drug use among students of Abadan University of Medical Sciences and Health Services using the theory of planned behavior
- Investigating the Predictors of Breakfast Behavior among Elementary School Students in Shadegan Using Planned Behavior Theory
- Prevalence and factors related to behavioral disorders in primary school students in Shadegan
- Evaluation of cognitive factors affecting the prevention of skin cancer among high school students in Abadan using social cognitive theory
- Prevalence and factors related to Ritalin abuse among students of Kermanshah University of Medical Sciences in 2012
- Study of Predictors of Quality of Life Based on Prescott Process Model among Addicts Referred to Addiction Treatment Centers in Kermanshah in 2012
- Investigating the effective factors on the behavioral intention of e-learning among the faculty members of Kermanshah University of Medical Sciences using the technology acceptance model

- Evaluation of web-based educational method, anatomy course for medical students of Kermanshah University of Medical Sciences
- Investigating the factors affecting the understanding of pharmacy students of their professional obligations using the theory of planned behavior
- Evaluate web-based educational intervention to promote negative beliefs about substance abuse
- Comparison of self-esteem, source of control and their relationship with educational status of students of Kermanshah University of Medical Sciences and Health Services
- Investigating the factors related to the behavioral intention of pharmacists in Kermanshah regarding the reporting of drug side effects
- Study of predictors of smoking among students of the University of Medical Sciences and
